Install the Camera-Interface Software

1. Power on the computer and insert the QImaging USB stick into your USB drive.

2. Install camera drivers by choosing "QI_setup.exe".

3. Follow the installation instructions on screen.

4. Restart your computer and connect the camera to the PC.

5. If you purchased the QCapture Pro software, please follow the installation instructions on the QImaging USB in the Document folder.

More detailed installation instruction can be found in the camera instruction manual on the USB stick.
