Setting up Photometrics Camera in Micro-Manager

1. Start Micro-Manager and then select Default Demo CFG
2. Tool / Hardware Configurations

3. Select Create New Configuration, then click “Next”
4. Select appropriate camera driver PVCAM from the list, then click “Add”:

5. Click “OK”
6. Click “Next”

7. Click “Next”
8. Click “Next”

9. Click “Next”
10. Rename by removing only “MMConfig_demo.cfg”, then entering a new name such as “Photometrics.cfg”.

11. Click “Finish”
